### GILEAD.

Miss Margaret Forbes with her young friends were treated to a very enjoy- able frolic on Saturday afternoon. At half past one twelve of the young people started from the village for a straw ride, with Mr. Ralph Peabody as driver. They drove around through Shelburne, stopping at Mr. Albert Larys where the party was conducted by Miss Madeline and Mr. Don. Lary to the dining room tastefully decorated with autumn leaves, where was spread a beautiful feast to which the hungry, merry young people did justice. They re- turned their homeward way with cheers and shouts of jollity. This was a good- bye frolic for some of them, as Miss Margaret expects soon to join her par- ents in her new home in New Sharon.

### A NATION OF CRIPPLES RHEUMATISM BEYOND CONTROL.

The Only Hope to Rheumatic Suffer- ers is Urin-O Treatment.  
If Rheumatism continues to spread as it has in the past few years, it would seem as though we would before long become a nation of cripples. The ter- rible destructiveness of this disease is apparent on every side of us. Almost nine out of ten of the cripples one meets had their afflictions brought on by Rheumatism. How many thousands are there that are hopelessly bed ridden and whom we never see. Rheumatism from the very nature of the disease can never cure itself and if neglected is bound to grow worse instead of bet- ter. If you ever have any twinges of Rheumatism go to your druggist and get a bottle of Urin-O, the wonderful new Rheumatic Specific. It will cure you and is the only treatment in the world that will cure you permanently and thoroughly. Urin-O cures by its direct action on the muscles, blood and kidneys. It attacks out the poisons Uric and Rheumatic acid and drives it from the system and it is only a treatment of such a nature that will cure Rheuma- tism. Urin-O is sold and personally rec- ommended in Bethel, by W. E. Besserman.

to insure annual success.  
The members were reminded that it has developed upon him to manipulate the entire machinery from the first to the last and that a director, to be at his best and to do his best, should not be obliged to attend to every detail in connection with the successful carry- ing out of the work in regard to the choruses and Festivals. He suggested that a committee should be appointed to do the detail work and that funds should be raised to pay the expenses of these committees. He also stated that his own remuneration in the past had not been sufficient to make him wealthy but that much of his own traveling expenses in connection with his work had been borne by himself, and he finally informed the people that unless a change be made his resignation must stand.

Following Professor Chapman's ad- dress several prominent members of the association were called upon and were very enthusiastic in their purpose to perfect some plan whereby Professor Chapman can remain Director of the Festivals and be relieved of the drudg- ery which he has hitherto been oblig- ed to bear.

### MUCH CONCERN FELT.

Ordinary Methods for Treating Catarrh Prove Unsuccessful.

Recent statistics showing an increase in catarrh have shaken the confidence of medical men in the usual prescrip- tions to safeguard human health from the ravages of the disease.  
When stomach dosing proved ineffec- tive, it was natural to look for some other treatment, and it is believed that in Hymel an absolute cure for all cat- arrhal troubles has at last been found. Breathed through a neat pocket inhaler, its healing medication reaches every spot where there are catarrhal germs, destroys them, prevents their future growth, and soothes the irritated mu- cous membrane so that relief is felt almost instantly, while lasting cure is practically sure to follow.  
The complete Hymel outfit costs but \$1.00, and is sold by H. S. Pughard un- der an absolute agreement to refund the money if it does not give satis- faction. It is the only cure for catarrh that has ever been sold under a guar- antee to cost nothing unless it cures, but H. S. Pughard has so much faith in its power to cure all catarrhal troubles that he is willing to take the risk, so if Hymel does not help you, there will not be a penny's expense. Get an outfit at once on this liberal plan.

A weak Stomach, causing dyspepsia, a weak heart with palpitation or intermittent pulse, always means weak stomach nerves or weak heart nerves. Strengthen these inside or controlling nerves with Dr. Shoop's Restorative and see how quickly these ailments disappear. Dr. Shoop of Wis. will mail samples free. Write for them. A test will tell. Your health is certainly worth this simple trial. Sold by H. S. Pashard.

Conclusive.

"Do you think that horrid story about Beatrice is true?" "It must be, I heard it from her dearest friend."—Life.

Stomach troubles, Heart and Kidney ailments, can be quickly corrected with a prescription known to druggists everywhere as Dr. Shoop's Restorative. The prompt and surprising relief which this remedy immediately brings is entirely due to its restorative action upon the controlling nerves of the stomach.

He Wasn't Worth It.

He-it costs me nearly \$3000 a year to live. She—What a waste of money.

Thomas A. Edison, the great American inventor, says "Fully eighty per cent. of the illness of mankind comes from eating improper food or too much food; people are inclined to overindulge themselves." This is where indigestion finds its beginning in nearly every case. The stomach can do just so much work and no more, and when you overload it or when you eat the wrong kind of food, the digestive organs cannot possibly do the work demanded of them. It is at such times that the stomach needs help; it demands help, and wants you by head and indigestion. You should attend to this at once by taking something that will actually do the work for the stomach. Kodol will do this. It is a combination of natural digestants and vegetable acids and contains the same juices found in a healthy stomach. It is pleasant to take. It digests what you eat. Sold by H. S. Pashard and W. E. Bosserman.

A Habit.

No precious has time grown of late. Men cannot stop, we're heard, to mildly say, "prevalence." They want a shorter word. Washington Star.

To check a cold quickly, get from your drugstore some Little Candy Cold Tablets called Preventall. Burgey every where are now dispensing Preventall, for they are not only safe, but decidedly certain and prompt. Preventall contains no quinine, no laxative, nothing harsh nor sickening. Taken at the "onset stage" Preventall will prevent Pneumonia, Bronchitis, La Grippe, etc. It costs the same Preventall. Good for feeble children. 45 Per cent. 65 cents. Trial boxes 5 cts. Sold by H. S. Pashard.

As It Should Be.

Said She—I never saw a more easy going, harmonious and cordial couple than George and Mollie. Said He—They will surely be happy if they marry each other. Said She—Because why? Said He—It would be a safety match.

It Would Be So.

Copier—Speaking of the weather, am not in the price of them all. Mrs.—How do you figure that out? Copier—It goes before a fall, you know.—Chicago Daily News.

"Do you think," asked the sweet girl's mother, "that Mr. Wilkins is serious?" "Serious? No, he's worse than that. He stayed here till nearly 12 o'clock last night, and anyone who had studied his face might have thought he was sitting up with a corpse."—Chicago Record Herald.

You never have any trouble to get children to take Kennedy's Laxative Cough Syrup. They like it because it tastes nearly like maple sugar. Kennedy's Laxative Cough Syrup is a safe, sure and prompt remedy for coughs and colds and is good for every member of the family. Sold by H. S. Pashard and W. E. Bosserman.

Just Possible. Mrs. Hauer (reading)—Here's an account of a village person who left the pulpit to become an actor. I wonder what could have induced him to do a thing like that?

Somewhat. "As a poet, however he was some what in advance of his age." "Indeed?" "Yes, he tried to convert his home into a museum before he had starved to death in it."—Puck.

If taken patiently and persistently will relieve the most obstinate cases of indigestion, constipation, flatulence, bad breath, no matter how long standing. That's what Hollister's Rocky Mountain Tea will do. 25 cents, tea or tablets. W. E. Bosserman.

Out and In. Mrs. White (sympathetically)—Your husband is in trouble again, Ma. Mrs. Black (cheerfully)—No, he's out of trouble, dear now—dear now—let's go to jail—Puck.

DANGER FROM THE FLAG. There's grave danger from the plague of coughs and colds that are prevalent unless you take Dr. King's New Discovery for Consumption, Coughs and Colds. Mrs. Geo. W. Walker, of Forest City, Me., writes: "It's a Godsend to people living in climates where coughs and colds prevail. I had it quickly cured them." It prevents Pneumonia, cures La Grippe, gives wonderful relief in Asthma and Hay Fever, and makes weak lungs strong enough to ward off Consumption. Coughs and Colds. 50c and \$1.00. Guaranteed by W. E. Bosserman. Trial bottle free.

Often the Case. Nigger—Dad, see tell us taken. Nigger—But their temptations do.—Chicago News.

## FEEDING RACKS.

A Convenient and Cheap Arrangement for Handling Large Flocks.

As feeders will soon begin stirring around the country in search of feeding stock a few hints concerning the feeding racks may be found helpful at this time. Racks can be built any length up to 20 feet that will answer for other hay, fodder, or grain feeding. The floor of the rack should be 18x10 inches wide with side boards for the floor from 2 1/2 to 4 inches high. For yearlings or older sheep the bottom of the rack should be about 18 inches from the ground and 3 feet is about the right height for the rack. For state, old barrel staves serve the purpose very well and if placed about 3 inches apart the sides of the rack can be built perpendicular so that the sheep can eat with their heads inside the rack between the slats.

In filling the racks it is well to remember that if the hay is cut in loose, the sheep will soon have it all out under their feet, and if too much hay is put in at one time they will eat only a portion of it as they soon become disgusted with any kind of roughage that they have breathed on for awhile. The finer parts of the hay, as a clover heads and leaves will not be found by the sheep if they are given more than they will eat up clean at one time. Good strong racks can be made of inch plank.

The rack should be cleaned thoroughly once every day. If ear corn is fed the cobs should always be thrown out before each meal and under no conditions should chickens be allowed to roost on the racks over the troughs. If the sheep refuse to eat from any one section of the rack or trough the reason should be found out at once and the racks cleaned and even scrubbed if necessary. Sheep feeders who use corn instead of screenings claim that very good results can be had by feeding them twice a day with plenty of good corn-fodder and alfalfa hay. In the northern districts, however, when sheep are brought into the feed yards, screenings and clover hay form practically the whole diet.

We understand that a great many farmers are expecting to make a start feeding sheep this year and those who have not had any previous experience in this line would do well to have the racks and troughs in shape before the active feeding season opens.

## VAT FOR SCALDING HOGS.

Convenience at Hog-Killing Time Which Can Be Made at Home.

A very good vat for heating water or scalding hogs can be made in the following manner. Take two 2x12 planks and cut them so they are six feet on one edge and five feet two inches on the other edge. These form the sides of the vat. For the ends take two pieces 2x12, each plank three

feet long. About three inches from each end of the sides cut a groove across two inches wide and three-quarters inches deep for the end of the sides to fit. Holes should be bored at top and bottom for half inch bolts across the ends to hold the sides in position.

The bottom of the vat is made of sheet iron nailed to the bottom and on to the vat. The vat should be four enough to come around both ends and fasten at top and, also, should be wide enough to come up the sides for two or three inches. Three iron, 1 1/4 inches thick and one inch wide are passed under the tank and used to support the bottom. They are shown at AAA. These should come up at least four inches at the side.

A trench eight feet long, 20 inches wide, 15 inches deep, should be dug and the vat placed over it. The trench should be dug so that the vat has a straight draught under the vat. The vat two-thirds full of water. The scalding bench should be set against the side of the vat. Light chains each about eight feet long are used to lower and raise the hog into the water. These chains should be fastened at the edge of the scalding bench and should be placed about two feet six inches apart. By placing these chains above the vat, says Prairie Farmer, the hog can be lowered into the water and when scalded can be readily removed.

Pasturing Hogs on Rape. Now is the time to turn on to the rape and pea mixture which you sowed last month. Don't crowd it by keeping them on it all the time, but alternate two or three days at a time on good pasture and then on rape and clover. Separate the ewes and lambs into different flocks even though the weeding has been completed.

Watch the Flock. Watch the flock closely during late summer. This is the time when diseases and insect pests gain a foothold. Don't let the flock remain in that back pasture without inspection more than 24 hours of the time. A car dog may destroy your stock even if you are cautious.

ment of this life I would willingly endure all the pains and tortures of eternal torture. Yes, Bob, for the right to have you call me yours for only while I heard the words, I would do anything. Bob, anything that was honorable.

He had drawn his head down close to his face, and her great blue eyes searched his as though they would pierce his very soul. She was a child in her simple appeal for him to allow her to see his heart, to see that there was nothing black there.

As she gazed her beautiful hands played through his hair as do a mother's through that of the child she is soothing to sickness. "Bob, speak to me, speak to me," she begged, "tell me there was no dishonor in the getting of those questions. Tell me no one was made to suffer as my father and I have suffered. Tell me that the sentence and the conviction, the daughter's dragged to shame and the mother's driven to the madhouse as a result of this pain, cannot be charged to anything unfair or dishonorable that you have done. Bob, speak, answer me, or my made a mistake, if you have done that which in your great desire to aid me and my father seemed justifiable, but which you now see was wrong, tell it to me, Bob, dear, and together we will try to make it. We will try to find a way to atone. We will give the millions to the best, but penny to those upon whom you have brought misery. Father's love will not matter. Together we will go to him and tell him what we have done, what we have tried through, tell him of our mistake and in our agony be with him. Yes, Bob, a horror has my father of anything dishonorable that he will endure his misery.

CHAPTER VI. As I passed through my office a few minutes later I heard Bob's voice in French. "Bob," he said, "I am raised to passionate sequences." "Yes, Bob," I have done it single-handed. I have crowded Cammerer, crowded Oll, and the 'system' that ruled me to the street a few weeks ago. You have three millions, and I have seven. Now there is nothing but let her go to her home to your

Meeting Him in Town.

Mr. May's Love tells the following comic story in Mainly About People.

Meeting once in Bedford, I noticed that the shortest player, a young fellow clever and comely lad, looked very good and doing the greatest of the day.

I found that his father, who played the trumpet, set your husband down, and every now and then he gave me a kick, with the remark "Look you, Sonny! There is a lot a-coming."

### SHE DOES.

To see her no with eyes aglow  
An' 'vel a something to a crew,  
Her was head in her mother's light  
Across the hill an' out o' sight.  
With her short legs a-trudgin' glad  
On down the road away from dad.  
Oled to go visitin' out far  
To grandma's an' the rocky bar,  
In one more sight! A better sight!  
For me, though, when it's comin' night  
Is to look off across the glare  
An' see my baby trudin' home.

Hand in her mother's just as she  
At noonin' trudged away from me.  
Lookin' the same, exceptin' that  
She's got some blossoms in her hat.  
An' 'vel a dirty face, an' got  
A bunch o' witted blossoms an' hat  
In her small feet for her old dad,  
An' a grin on her face; Just glad  
To get back home as she could be  
To visit all away from me.  
An' she walks in just like she was  
My best an' sweetest one. Guess she don't

## Cooking-Ranges

### What Our NEW TYPE of Range Means

Maintaining the Crawford reputation for progress, we have constructed a new type of range which is better than even our heretofore best. In this new design the smoke and upward kind hearth is omitted. The ashes are disposed of by falling into a HOD far below the fire, which makes their removal easier and the grates to last longer. The Coal and Ash Hods are side by side, of the same size, and the Ash Hod being emptied can be refilled full of coal. There is also more room on top of these ranges. The "Palace" is extra large size and the "Castle" smaller.

ALL the famous Crawford features are present: Single Damper, Patented Grate, Cop Joint Oven Floor, Ashes-Loaded Oven, Improved Oven Indicator. Send for our booklet.
